Summary

A technically proficient BSc (Hons) Computer Games (And Programming) graduate (2:1) from the University of Essex, with professional experience in high-pressure operational environments, including Royal Mail and the NHS Digital Team. Proven track record of managing real-time data across multiple systems with extreme attention to detail. Awarded for critical thinking and professionalism in technical settings, I am highly adept at maintaining accurate information flow under pressure, with extensive experience in varied shift patterns, including nights and peak-period logistics. As a hardworking individual, I am eager to embrace future opportunities and expand my knowledge through this role.

Education

BSc (Hons) Computer Games | University of Essex | Sept 2021 – July 2025

- **Final Classification:** Upper Second Class (2:1)
- **Key Modules:** Team Project Challenge (1st), Introduction to Artificial Intelligence (1st), Application Programming (2:1), C++ Programming (2:1), Computer Game Design (2:1).
- **Additional Modules:** Computer Game Programming (2:2), Data Structures and Algorithms (3rd), Web Application Programming (3rd).
- **Key Capstone Project:** Engineered a complex, real-time data processing system using Python and third-party APIs. This required me to monitor live audio/visual inputs and ensure the system generated accurate, contextually relevant automated responses in real-time, proving my ability to manage complex data flows reliably.

Other

2020 College: Level 3 extended Games design and Development At Northbrook Metropolitan college (Merit)

2018 GCSEs: 8 in total, including 6+ in Maths, English and Science. As well as 6 in Computer Science.

Key Skills & Technical Proficiency

- **System Navigation & Multi-System IT Skills:** Expert at transitioning quickly between complex software interfaces, databases, and operational systems. My background in programming (Python, Java, C++) demonstrates a high technical aptitude, ensuring I can rapidly master any needed necessary specialist industry software.
- **Real-Time Data Accuracy:** Proven ability to process and deliver professional, highly accurate information across digital platforms. My technical background ensures meticulous attention to detail when inputting time-sensitive data, guaranteeing that internal teams and external customers receive reliable updates.
- **Operational Resilience & Disruption Management:** Highly experienced in time-critical, 24/7 environments where decisions directly impact customer satisfaction. From managing intense, high-volume logistics during the "December Chaos" at Royal Mail to utilizing technical problem-solving skills at the NHS, I maintain a calm, solution-focused approach under pressure.
- **Full Use of Adobe Suite:** Over the last 6 years, I have self mastered the full Adobe Suite from scratch. I have been following tutorials and learning from my own practice to become highly proficient in Photoshop and Premiere Pro (and semi-proficient in DaVinci Resolve), proving my ability to learn new specialist software.
- **Fault Diagnosis & Equipment Reporting:** Drawing on my experience as a QA Games Tester and my time with the NHS Helpdesk, I possess a strong track record of identifying, tracking, and reporting hardware/software faults. I am highly capable of efficiently reporting and monitoring faulty information supply equipment to ensure minimal downtime.
- **Empathetic Communication & Crisis Support:** Extensive experience in customer-facing roles (Tesco, Butlins, The Lamb Inn) has honed my ability to communicate clearly and empathetically. I am well-equipped to act as the "voice of the customer," whether dealing with station Emergency Help Point calls or supporting station colleagues during high-stress situations.
- **Proactive Problem Solving:** Nominated for a "Critical Thinking" award by the NHS for thinking "outside the box". I apply this proactive mindset to anticipate issues and find the best alternative solutions for customers during times of need.
- **Collaborative Teamwork & Stakeholder Liaison:** Strong track record of working collaboratively to achieve shared goals. I excel at cross-team communication, giving me the foundation to coordinate with operational managers and frontline staff to ensure service adjustments are implemented accurately.

Past Employments And Experiences

NHS Connectivity Team (Work Experience) | NHS Sussex trust | December 2025 to April 2026

- I was monitoring real-time systems, network uptime, and conducting technical fault analysis across a complex healthcare environment. My role involved actively tracking and diagnosing connectivity issues to ensure seamless data flow and minimal operational downtime. This responsibility proved my ability to manage complex data systems reliably and maintain a calm, solution-focused approach when supporting time-critical organizational operations.

Royal Mail Postperson With Driving | Royal Mail | Nov 2025 To (Ongoing)

- Accustomed to a 24/7 operational environment, I work a diverse roster of mid-day to late evening shifts, managing high-volume logistics and time-critical deliveries independently. Successfully navigating the intense pressure of the "December Chaos," I consistently deliver roughly 100 parcels per shift. This role requires me to utilize digital tracking systems accurately while proactively ensuring customer satisfaction and smooth service delivery across varied routes in Bognor Regis.

NHS Digital Team (Work Experience) | NHS Sussex trust | July / Aug 2025

- Selected for a cross-departmental placement shadowing the IT, Security, and Helpdesk departments, I gained foundational insight into tracking and reporting technical faults. I was officially nominated for a "Critical Thinking" award for proactively seeking the best solutions to hardware and software issues, and received a certificate for overall professionalism.

Games Comp Science Programming Graduate | Essex University | Sept 2021 – July 2025

- Throughout my degree, I developed strong IT skills and the ability to work seamlessly across multiple systems by learning various complex programming languages. I collaborated effectively on team projects and game jams, ensuring high attention to detail and accuracy when delivering time-sensitive project milestones and learning brand new technical systems.

Kitchen Porter | The Swan Inn | May 2024 – Aug 2024

- Working in a highly demanding, fast-paced environment, I supported the culinary team by maintaining strict cleanliness and operational efficiency. This time-critical role required me to proactively prioritize tasks and work seamlessly with colleagues to ensure the smooth, continuous operation of the kitchen during peak hours.

Retail Assistant | Tesco Superstore | Temporary Post 2023

- Operating point-of-sale systems in a busy retail environment, I handled customer transactions efficiently while ensuring accurate data entry. I honed my clear, professional, and empathetic communication skills by interacting with a diverse range of customers, resolving routine queries promptly, and keeping the customer at the centre of my decision-making. Employed full-time in a high-pressure resort setting, I served as a highly adaptable customer experience agent across retail, catering, and attractions. I worked varied shifts from early mornings on sundays to past midnight on other days, I consistently prioritized customer welfare, proactively communicating clear information to ensure an outstanding, reliable experience for guests during their stay.

Customer Experience Agent | Butlins Resort, Bognor Regis | May 2022 – Sep 2022

- Employed full-time as a customer experience agent which required me to be adaptable in the context of working in retail outlets, catering, and attractions within the resort. I always endeavored to exceed customer expectations and provided an outstanding experience for guests during their stay.

QA Games Tester (Work Experience) | Nysko Games, Colchester | Sep 2021 – Jun 2022

- Operating in a deadline-driven technical environment, I was responsible for identifying, tracking, and reporting software faults across various platforms. This required exceptional attention to detail and accurate, time-sensitive reporting to ensure swift issue resolution, providing excellent foundational experience for tracking and reporting faulty information supply equipment.

Hospitality Team Member | The Lamb Inn, Rustington | 2021 – 2022

- Serving as a front-of-house team member, I utilized point-of-sale systems and order management tools to deliver prompt customer service. I focused on providing clear communication and a friendly, approachable style to safeguard customer interests and ensure a positive experience during busy service periods.
